PROFILE

Software Engineer with more than 5 years of experience, specializing in React and Next.js, with strong knowledge of Node.js and extensive work with React Native and Capacitor by Ionic. Passionate about building secure, high-quality, user-centered applications and delivering seamless cross-platform experiences. Alongside frontend and mobile development, I actively expand my cybersecurity knowledge through hands-on learning and security-focused practices. I also leverage AI-assisted development tools such as Cursor AI to improve productivity, code quality, and development speed. Driven by teamwork, clear communication, and creating supportive, collaborative environments where knowledge-sharing fuels success.

WORK EXPERIENCE

Software Engineer

Reea SRL

June 2021 - Present

- Worked as part of a team to develop a finance-related mobile application using React Native, focusing on performance, usability, and seamless cross-platform functionality.
- Built and maintained an accompanying admin panel to support backend operations and data management.
- Contributed to the development of an event booking web application using React and Next.js, implementing dynamic features and optimizing for SEO and performance.
- Assisted in developing a sports bar event planning platform with React, designing interactive interfaces and integrating real-time updates.
- Built a Python script integrating the Gemini image generation API to create food images from predefined prompts, upload them to Google Cloud Storage, and serve them in a food delivery app.
- Developed core features for a vehicle inspection management system using React and Next.js, handling scheduling, status tracking, and user workflows for multiple vehicle types.
- Helped develop a language learning mobile app, inspired by Duolingo, using React Native with Expo.
- Worked on developing a notary-focused app that leverages Gemini AI model to generate complete documents from templates and uploaded files, streamlining document preparation.

- Worked on a finance management mobile application using Capacitor, delivering secure and high-performance cross-platform experiences. Implemented biometric authentication for enhanced user security, developed file export functionality for financial reports, and managed in-app browser flows using Capacitor plugins. Collaborated closely with product and backend teams to ensure reliability, usability, and compliance with mobile best practices
 - Finalized the frontend and cross-platform mobile applications for **Schimburi.ro**, a marketplace dedicated to peer-to-peer exchanges. Developed responsive interfaces for listing creation, advanced search and filtering, user profiles, authentication, and exchange workflows using React, Vite, PWA, and Capacitor. Managed the mobile release lifecycle, including platform-specific configuration, build generation, testing, and submission to the Apple App Store and Google Play, while maintaining a modular architecture optimized for scalability and long-term maintainability.
-

EDUCATION

Babes-Bolyai University of Cluj-Napoca

2017-2020

Bachelor's in Marketing

Informal IT School

2020-2021

PHP Web Development

1 December University of Alba Iulia

2021-2024

Bachelor's in Computer Science

Google Cybersecurity Professional Certificate (in progress)

SKILLS

HTML, CSS, Javascript, Typescript, React.js, React Native, Capacitor by Ionic, Next.js, Three.js, React Three Fiber, Node.js, Python, PHP, MySQL, Docker

LANGUAGES

Romanian, English
